

CHATSWORTH
PRODUCTS

Increase Your Competitive Advantage with High-Quality, Customized Industrial Enclosures from Chatsworth Products

Successful Original Equipment Manufacturers (OEMs) are focused on providing customers with what they need, when they need it. In this competitive environment, lean processes and attention to detail are the stronghold OEMs need to stay ahead.

At Chatsworth Products (CPI), we understand what it takes to meet project requirements on time and on budget. Our goal is to provide you with industrial enclosures that are engineered to meet specifications, can be customized during the manufacturing process, and arrive ready for equipment integration, reducing your time-consuming fabrication tasks.

We are driven to help

- Focus on system design and integration
- Increase capacity
- Serve more end users
- Achieve consistent results

CPI is a proven solutions provider. Businesses from around the globe have benefited from CPI's "from scratch" customization capabilities that ensure a cleaner finish, made to your specifications, with no subpar retrofits or modifications.

Additionally, CPI is a recognized leader in enclosure design and manufacturing for a wide range of applications including industrial, data/communications, computer and networking environments.

We have competitive lead times and a wide variety of thermal management options including filter fans for air cooling and AC units for higher heat loads.

Industrial Enclosure Systems

Your customers come to you with new challenges and needs every day. CPI strives to meet these needs by continuously engineering high-quality products and solutions. RMR® (pronounced “armor”) enclosures are advanced storage solutions engineered with cutting-edge sealing technology to protect and secure equipment.

Features:

- Engineered to meet UL® 508-A specifications
- Third-party certified, NEMA Type 4, 4X, 12 / IP 55, 66, adaptable to NEMA Type 1, 2, 3, 3R & 5
- Fully welded, steel construction with powder coat paint finish
- Cooling, cable management and accessories available
- Enclosure modification options (size, openings, color)
- Delivered with competitive lead times
- Kitted with accessories to match job requirements

Power Management Solutions

CPI provides an extensive line of power management solutions that deliver safe and efficient power distribution to industrial applications. This includes innovative features of CPI's eConnect® Power Distribution Units (PDUs) such as:

- Market-leading temperature ratings of up to 149°F (65°C) for high-density, rugged environments
- Customization options for mixed outlet types
- Intelligent, remote monitoring and switching capabilities down to the outlet level

CPI Product Designer

Configure a Product

The CPI Product Designer gives you the ability to quickly select and accessorize RMR Industrial Enclosures under one part number for easy ordering and tracking.

Get bills of material (BOM), drawings and sales documents automatically. To explore this tool, visit chatsworth.com/product-designer.
