

32" Deep Sliding Shelf

Unlike most storage solutions that may cause kinking, twisting, and cutting of cables during self extension and retraction. CPI's flexible polycarbonate belt, which fits in the rear undercarriage, solves these problems. This belt easily attaches to either the left or right side of the vertical bracket and contains eight molder releasable clips that accommodate cable bundles measuring up to 1" in diameter. Flexible belt is made from flame retardant materials.

The shelf has an adjustable mounting depth of 28" to 40.5" and is offered in either a vented or non-vented style.

- Supports up to 160 lb using less than two RMU
- Locks in the closed position
- Open easily with accessible front lock levers providing greater stability while accommodating deep servers
- Maximum usable shelf space of up to 32"
- Cable management belt that provides a greater flexibility in the storage of wire bundles
- Designed for 36" or 39" deep cabinets
