23"-19" RAIL ADAPTER KIT

Mount your 19" wide equipment in a 23" wide cabinet with CPI's series of bolt-on brackets. The rail adapter kit is designed specifically to enhance the 23" MegaFrame® and does not compromise the many beneficial features of the cabinet. The option to use half rails remains viable and front to rear adjustability is maintained.

- Kit includes 12 adapters and packaged hardware
- Constructed of 14-gauge steel
- Adapters can be used with CPI's tapped 12-24, square-punched, Sun®, IBM® or HP® rails and are available for all cabinet heights
- Can be retrofitted to existing 23"W MegaFrames
- Front to rear adjustability remains intact with rail adapter installed
- Rail adapter increase cable routing space for high-density cabling applications
- Rail adapter kit is available for all cabinet heights
- Static load rating for the adapter kit is 1000 lb
