CABLE MANAGEMENT FINGERS KIT FOR SEISMIC FRAME® TWO-POST RACK

Organize patch cords and jumper cables by RMU on CPI's Seismic Frame® Two-Post Rack. The Seismic Frame Two-Post Rack is designed specifically to support network equipment in areas with seismic activity. The welded, steel Seismic Frame Two-Post Rack resists the swaying motion caused by earthquakes to reduce the amount of vibration transferred through the rack to equipment and is less likely to be damaged during a seismic event, which means faster network recovery.

- 7 RMU T-shaped plastic cable guides snap onto the front and rear of the rack frame
- Openings between the T-shaped guides align with each RMU on the rack
- The Single-Sided Kit includes 12 cable guides for one side (front or rear) of the rack; use 6 cable guides in each corner
- The Double-Sided Kit includes 24 cable guides for both sides (front and rear) of the rack

Part Number	Description	Shipping Weight
13696-001	Cable Management Fingers Kit, Single-Sided	7 lb (3.2 kg)
13696-002	Cable Management Fingers Kit, Double-Sided	14 lb (6.4 kg)

Color is Black.
