

PRODUCT APPLICATION

Analog KVM Switches

The CenterPoint™ KVM Switch/Console and CenterCade KVM Switch from Chatsworth Products, Inc. (CPI) provide a simple, compact and cost-effective keyboard, video and mouse (KVM) switching solution for small and medium-sized computer rooms. Use CPI's CenterPoint KVM Switch/Console and CenterCade KVM Switch to easily access all of the computers in your rack, cabinet or enclosure systems with a single set of integrated peripherals.

- Access up to 16 computers from a single switch
- Access up to 256 computers with expansion switches
- Switches include eight or 16-ports for KVM connections to computers
- Compact design utilizes only 1 RMU of space in 19"W EIA racks, cabinets and enclosures
- Consoles include an integrated flat panel monitor, keyboard and touch pad
- View computers from the rack-mount console or from your desk
- Transfer easily between computers with an intuitive, on-screen menu or keyboard hot keys
- Active port monitoring using multiple processors assures availability of computer KVM signals
- Two-user models allow simultaneous access to different computers
- Password protection prevents unauthorized access through consoles
- Convenient access to all computer equipment
- Easily expands as your network grows

CenterPoint KVM Switch/Console – Combination eight-port or 16-port one-user or two-user KVM switch and console with integrated keyboard, touch pad and flat panel monitor. Access all computers using the integrated console or through an external connection to a CenterView KVM Console, an IP Dongle or a second set of peripherals.

CenterView KVM Console – An integrated keyboard, touch pad and flat panel monitor that uses only 1 RMU. CenterView KVM Console attaches to CenterPoint KVM Switch/Console, CenterCade KVM Switch or directly to a computer.

CenterCade KVM Switch – An eight-port or 16-port one-user or two-user KVM switch used as an expansion switch or as an alternative to CenterPoint KVM Switch/Console. The one-user models have connections for one CenterView KVM Console, IP Dongle or set of peripherals. The two-user models have connections for two.

KVM Signal Cable – Attaches computers, expansion switches and CenterView KVM Console to the CenterPoint KVM Switch/Console and CenterCade KVM Switches.

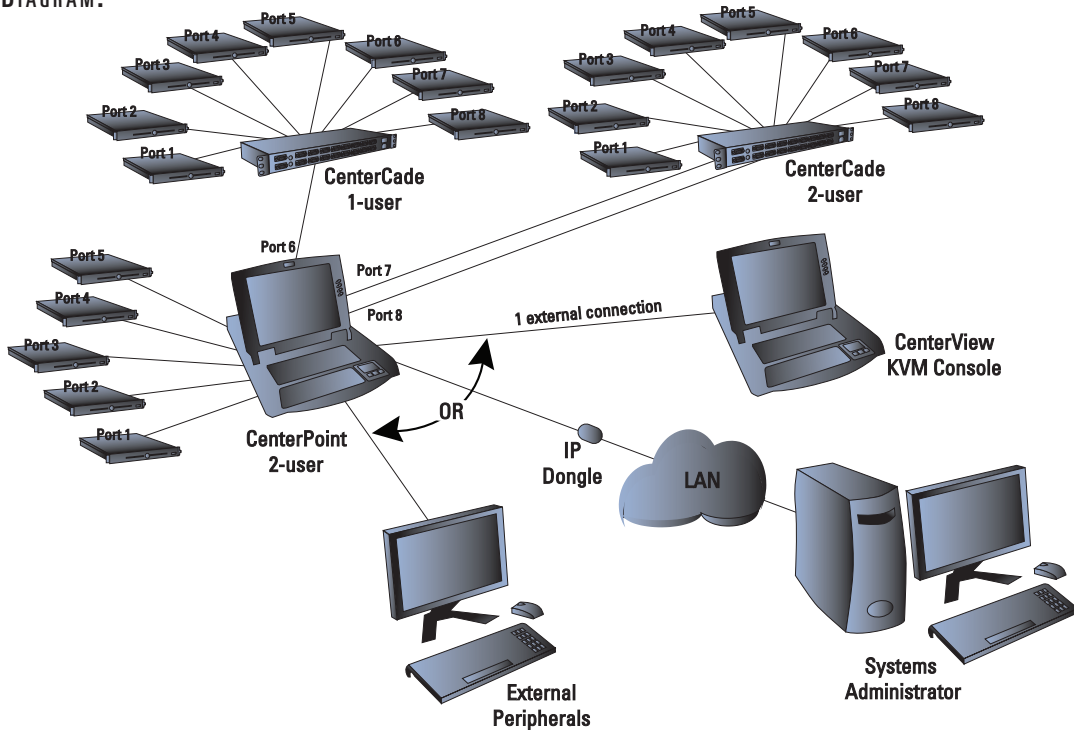

Converter for KVM Signal Cable – Converts the PS/2 keyboard and mouse connections on the KVM Signal Cable into a USB connection or SUN connection.

Extension Cable for KVM Signal Cable – Add length to KVM Signal Cables or attach external peripherals to CenterPoint KVM Switch/Console or CenterCade KVM Switches.

KVM IP Dongle – Attaches to CenterPoint KVM Switch/Console or CenterCade KVM Switch to provide network access to the switch through a web browser. Provides a single 10/100 Mbps Ethernet connection.

ORDERING INFORMATION:

Part Number	Description	Shipping Weight
CenterPoint™ KVM Switch/Console		
35910-811	1-User, 8-Ports, 19"EIA x 1 RMU, Black	44 lb (20.0 kg)
35910-161	1-User, 16-Ports, 19"EIA x 1 RMU, Black	44 lb (20.0 kg)
35910-832	2-User, 8-Ports, 19"EIA x 1 RMU, Black	44 lb (20.0 kg)
35910-162	2-User, 16-Ports, 19"EIA x 1 RMU, Black	44 lb (20.0 kg)
CenterView KVM Console		
35920-001	19"EIA x 1 RMU, Black	22 lb (10.0 kg)
CenterCade KVM Switch		
35930-801	1-User, 8-Ports, 19"EIA x 1 RMU, Black	7 lb (3.2 kg)
35930-161	1-User, 16-Ports, 19"EIA x 1 RMU, Black	7 lb (3.2 kg)
35930-802	2-User, 8-Ports, 19"EIA x 1 RMU, Black	7 lb (3.2 kg)
35930-162	2-User, 16-Ports, 19"EIA x 1 RMU, Black	7 lb (3.2 kg)
Cables		
35941-006	KVM Signal Cable, PS/2, 6'L (1.8 m)	2 lb (0.9 kg)
35941-009	KVM Signal Cable, PS/2, 9'L (2.7 m)	2 lb (0.9 kg)
35941-012	KVM Signal Cable, PS/2, 12'L (3.7 m)	2 lb (0.9 kg)
35941-020	KVM Signal Cable, PS/2, 20'L (6.1 m)	2 lb (0.9 kg)
35941-112	Extension Cable for KVM Signal Cable, (1) VGA + (2) PS/2, 12'L (3.7 m)	2 lb (0.9 kg)
Converters		
35941-121	For KVM Signal Cable, PS/2 to USB	2 lb (0.9 kg)
35941-123	For KVM Signal Cable, PS/2 to SUN 13W3 Video and 8-pin Keyboard	2 lb (0.9 kg)
KVM IP Dongle		
35901-300	(1) VGA + (2) PS/2-to-RJ45	2 lb (0.9 kg)

Note: Order one KVM Signal Cable per computer-to-switch connection. Use extension cable and converter if required. Use two KVM Signal Cables (two KVM ports) for 2-user switch-to-switch connections. Contact CPI Technical Support for configuration assistance.
