

Filtered Ventilation System For 30"D (760 mm) M-Series MegaFrame® Cabinet

The Deluxe Filter Cabinet Ventilation System provides "positive pressure" inside the cabinet, ensuring the highest level of protection from airborne dust particles. This system has the fans and filters installed at the bottom of the cabinet. Air exhausts through vents in the cabinet top. Equipment may not be mounted in the 2U at the bottom of the cabinet to allow clearance for cabinet intake air.

The Standard Filter Cabinet Ventilation System is for the retrofitting of M-Series MegaFrame Cabinets with fans already located on the cabinet top.

- For 19"W (482.6 mm) and 23"W (584 mm) x 30"D (760 mm) MegaFrame Cabinets
- Air Filter Kit with 115 VAC fans provides up to 400 CFM and has an attached 15'L (4.6 m) power cord with a NEMA 5-15P plug
- Air Filter Kit with 230 VAC, 50/60 Hz fans provides up to 400 CFM and has an attached 15'L (4.6 m) power cord with a NEMA 6-15P plug
- Trim-to-fit filter media is readily available from many commercial suppliers or can be ordered directly from CPI
- 3/8" (9.53 mm) thick filter provides 70-75% dust particle retention
- One filter provided with each kit

Note: This product only available for 30"D (760 mm) M-Series MegaFrame® Cabinets. Unit will generate 48 db noise level. For other depths, contact Technical Support at 800-834-4969.
