

Installation Instructions

INTELLIGENT FAN KIT

Installing the optional Intelligent Fan Kit

A four-fan array attaches to the top of the cabinet to remove hot air from the rear of the cabinet. Use with a solid rear door and a perforated front door.

Parts List

Fan assembly
3-prong grounded power cord
Four 10-32 screws
Four 10-32 nuts

1. Position the fan assembly on top of the cabinet with the plug facing the front of the cabinet.
2. Fasten with the included hardware.
3. Plug the power cord into the front of the fan assembly and then attach to the power supply.
