

# PRODUCT ENHANCEMENT

ORGANIZING. STORING. SECURING.

## BENEFITS:

- New Easy-to-Remove, Locking Side Panels allow easy access to equipment even in fully loaded cabinets.

- Side panel design maintains equipment security.

- Flush-mounted lock allows buying cabinets with side panels.

- Existing CPI cabinets are easily retrofitted.

## EASY-TO-REMOVE LOCKING SIDE PANELS SIMPLIFY ACCESS

Accessing equipment in a fully loaded cabinet is easier than ever with Chatsworth Products, Inc.'s new Easy-to-Remove Locking Side Panels. These new side panels are now standard for M-Series MegaFrame® and C-Series SlimFrame™ Cabinets six feet high and taller.

The Easy-to-Remove Locking Side Panel is removed without entering the cabinet. Simply use the key to unlock the panel and then lift up and off the frame. The Easy-to-Remove Locking Side Panel eliminates the need to access fasteners inside of a densely populated cabinet.

The new side panels are designed with a single, flush-mounted, keyed lock at the top of each panel. Spring-steel retainer clips, one at each lower corner of the side frame, hold the bottom of the side panel snug against the frame. Double-ended ratchet fasteners and button bumpers also ensure a snug, rattle-free fit. Locks have a nickel finish. One key unlocks both side panels and doors.

The former bolt-on side panel will continue to be available as a service part. Existing MegaFrame and SlimFrame Cabinets can be easily retrofitted with new Easy-to-Remove Side Panels. Refer to the matrix below for complete service part listing.
