

# NEW CATALOG ITEM

ORGANIZING. STORING. SECURING.

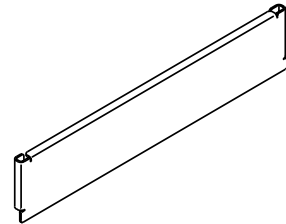

## FEATURES:

- Hides patch cables from view for a cleaner, more attractive finish.
- The cover quickly "Slips-On" the Ring Panel for an easy tool-free installation.
- Patch cords are easily added and removed with cover installed.
- Provides a finished system look when used with similar covers and accessories available for the CatRack® Wire Management System.
- Made from sturdy, light-weight aluminum.
- Available in 19", 23" and 25" widths.
- Sold Individually.

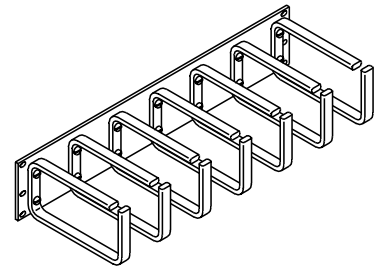

## SLIP ON COVER

The new CPI Slip-On Cover completes a complimentary line of products that will help make a showplace of your CatRack® Wire Management System. The Cover is designed for use with CPI's Large Horizontal Ring Panel (ref. p/n 11564-xxx) found on wire management racks in your Data Center, or Main Cross Connect, Intermediate Cross Connect and Telecommunications Closets. It easily attaches to the Ring Panel without the use of any tools. Once attached, patch cords can be placed in and removed from the Ring Panel without disturbing the Cover. Best of all, the Cover provides a clean, attractive finish to the front of the rack and hides the wire manager and patch cords from view. Use it to complement the Patch Panel Plex Covers for the Vertical Cabling Sections and the Clip-On Cable Covers for the 19" Horizontal Wire Management Panels on your Deluxe CatRack® Unit.

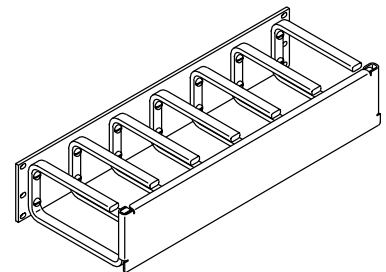

Cover your cable management with CPI Style. Please contact your local authorized CPI Distributor or CPI Customer Service Representative for more information.
