Space–Saving Duo

New Accessories Maximize Cabinet and Rack Space

Buy the Duo and Save!

Chatsworth Products, Inc. (CPI) now offers its two newest accessories under a single part number, making the Space-Saving Duo not only easier to order but also more cost-effective.

The Space-Saving Duo maximizes usable space in your 19"W data cabinet or rack, offering versatility in mounting locations and providing complete functionality. The Duo consists of:

The **LCD Monitor Shelf** featuring a sleek 15" flat-panel monitor and requiring just over 1 RMU – compared to the typical 10 RMU to 14 RMU needed by other computer monitors. This unique design frees valuable space for other equipment. The LCD Monitor Shelf stores horizontally inside your cabinet or rack. To use the monitor, slide out the shelf and rotate it to a position in front of your other mounted equipment. A unique friction plate holds the device at any angle you choose. To maintain system security, you can view the screen behind either plexiglass or hi-flow perforated metal cabinet doors. The monitor also includes built-in, high-quality speakers – an additional space-saving feature.

As a perfect complement to the LCD Monitor Shelf, CPI's **Keyboard+Tray** requires only 1 RMU yet features an IBM-compatible (PC, XT, AT and PS/2) keyboard with full-size keys for comfortable typing. In addition, the keyboard contains a built-in trackpad, eliminating the need for a mouse, tail and separate tray. The keyboard has two PS/2 standard connectors – one keyboard, one mouse.

Because of each product's space-saving design, you can mount the keyboard at a comfortable typing height, with the monitor placed at a desirable viewing height. The set is available for both two-post and four-post installations with each product shipped fully assembled. Purchasing the Space-Saving Duo as a single unit allows you to save space and save money while creating a highly integrated, highly functional system.

Monitor Type	15" LCD Monitor
Mounting Depth	26" to 38" mounting depths inside cabinet or four-post rack; no min/max for two-post racks
Maximum Resolution	1024 x 768 (adjusts to full screen regardless of input resolution)
