your technology equipment...

T-Series SteelFrame Cabinet

Enhanced with
more features and
options for any
application.

Features at a glance:

- Available in 20 sizes to fit standard applications
- New swing handle and lock options
- 44" (1120 mm) deep cabinets provide additional interior space for cable and power management accessories
- CPI Passive Cooling® thermal management accessories control airflow to improve thermal performance
- Steel construction provides a static load rating of 2000 lb (907.2 kg)
- Offered in three styles to match site security and airflow requirements
- New redesigned caster kit provides improved stability

See Reverse for Details.

T-Series SteelFrame Cabinet

Front and rear view of T-Series SteelFrame Cabinet with Curved Perforated Metal Front Door and Double Perforated Rear Door.

The T-Series SteelFrame Cabinet was designed for applications requiring a fully featured standard solution for mounting and securing electronic, network and security equipment. Now available with CPI Passive Cooling® Solutions, the T-Series SteelFrame Cabinet can be used in any application. This innovative thermal management technique allows you to isolate hot air with the Vertical Exhaust Duct and control airflow through the cabinet space in turn reducing data center energy costs and maximizing cooling unit efficiency. Add our comprehensive range of accessories from shelves and cable management products to power strips and fans for a complete, affordable solution.

- Available in standard sizes to fit most applications – 24" (610 mm) or 27.3" (693 mm) wide; 78" (42 RMU) or 84" (45 RMU) heights; 22" (574 mm), 30" (760 mm), 36" (910 mm), 39" (990 mm) or 44" (1120 mm) usable depths
- Supports 19" EIA equipment – includes two pairs of adjustable-depth equipment mounting rails to provide critical front and rear support for rack-mount server and data storage equipment
- Ready to manage cables – includes an adjustable-depth Vertical Cable Manager to organize cables with attachment points for up to four additional cable managers
- Easy access to equipment – easy-to-remove, lockable side panels and doors allow easy access to all sides of equipment
- Controls airflow – cabinets with a Vertical Exhaust Duct also include an Air Dam Kit and Rear Door Seal which increases thermal performance by guiding airflow one way from front door to duct
- Adapts for changing needs – a wide range of power, cable and thermal management accessories let you re-configure the cabinet to support new requirements from equipment changes

Additional Products to Complement Your T-Series SteelFrame Cabinet:

- 1 **Low Profile Fixed Shelf**
Cost-effective steel shelf adjusts 20"-36"D (510 mm - 910 mm). Occupying less than 1 RMU, the Low Profile Shelf is only 1.5"H (38 mm), conserving valuable cabinet space. Shelves are available in vented or non-vented styles. Shelves are 17.5"W (445 mm) and have a static load rating of 100 lb (45.4 kg). Ships individually.
- 2 **Bottom Panel Kit**
The Bottom Panel Kit enhances thermal performance by blocking airflow through the base of the cabinet to prevent hot air from escaping through the opening at the bottom of the cabinet. Use on cabinets that are placed on leveling feet or casters (elevated above the floor). Includes a large, brush-sealed cable opening near the rear, center of the panel.
- 3 **Caster Set for T-Series SteelFrame Cabinet**
Optional heavy-duty casters easily attach to T-Series SteelFrame Cabinet. Includes four 3" (80 mm) diameter casters and required mounting hardware. The front casters swivel; rear casters are fixed for improved stability.
- 4 **Bonding & Grounding Kit**
Use this all-in-one kit to bond and ground your T-Series SteelFrame Cabinet. Side panels and doors are electrically bonded to the cabinet frame using #12 conductors factory cut-to-length and factory terminated. Kit also includes a 2-barrel grounding block that attaches to the cabinet frame.
