VERTICAL CABLE MANAGER FOR TERAFRAME™ CABINET SYSTEM

Organizing cables is critical to maintaining equipment because organized cables can be easily traced during a move, add or change and do not block airflow through equipment. TeraFrame has specialized power cable managers that keep power and network cables separated.

The Vertical Cable Manager for TeraFrame organizes cables as they enter and exit the cabinet's rack-mount space.

- Attaches to the equipment mounting rail and adjusts with equipment along the side of the cabinet
- Patented T-shaped cable fingers guide cables into each rack-mount space (RMU)
- Cable managers with short and long fingers are available
- UL Listed (File E227626)

For assistance in configuring your TeraFrame Cabinet, contact Technical Support at 800-834-4969 or visit CPIs Product Configurator at www.chatsworth.com/configurator.
