3" DEEP WALL ENCLOSURE FOR WIRELESS ACCESS POINTS/BRIDGES

WA064-WAP is a wall mounted enclosure for the Cisco® Aironet® 350 wireless access point or bridge. It provides a secure 9-1/2" wide by 6-1/2" high space for equipment up to 2-3/4" deep. Match drill the back of the enclosure to attach equipment. Cable tie points are located within the enclosure.

WA064-WAP is pre-punched for conduit with four 7/8" knockouts on the sides, top and bottom. There is a 1-3/8" knockout on the back surface, and two antenna openings (1" diameter, spaced 5" apart) on the top. Enclosure sides are vented. The door is fully hinged and opens down.

WA064-WAP is pre-punched with four 3/8" holes for wall attachment and includes installation hardware. The enclosure is available in a textured beige finish.
