MEGAFRAME® 23"-19" RAIL ADAPTER KIT

As the amount of equipment in the typical network storage cabinet increases, so does the need to accommodate varying widths of equipment within the same cabinet. Whether mounting 19" or 23" wide equipment, CPI has the solution with the new MegaFrame 23"-19" Rail Adapter Kit.

Already known throughout the industry for its versatility and easy scalability, the MegaFrame Cabinet System now adapts to changing equipment requirements more easily with the new rail adapter kit. A series of bolt-on brackets allows equipment mounting rails to be relocated from their original 23" wide mounting position, effectively creating a 19" mounting environment. Additionally, the front-to-rear pass-through created between the rail adapter and the horizontal slide rail provides more flexible cable routing possibilities than are available in cabinets with full length rail adapters.

The rail adapter kit is designed specifically to enhance the 23" MegaFrame and does not compromise the many beneficial features of the cabinet. The option to use half rails remains viable and front to rear adjustability is maintained. In addition, the static load rating for the adapter kit is consistent with the rating of the MegaFrame - 1000 lb.

Each rail adapter kit includes twelve adapters and packaged hardware. Rail adapters are constructed of fourteen-gauge steel and are available in three standard colors: white, gray, and black. Installation is made easy using packaged hardware and simple hand tools. Adapters can be used with CPI's standard, Multi-Mount™, or HP® rails and are available for all cabinet heights.

For more information, please contact your authorized CPI Distributor or CPI Customer Service Representative, or go to www.chatsworth.com

Note: Not recommended for use with CPI's Sun® Rails.

MegaFrame® 23" to 19" Rail Adapter Kit			
Part Number	Description	Color	Shipping Weight
10587-101	Adapter Bracket	Gray	5 lb
10587-201	Adapter Bracket	White	5 lb
