## PDU MOUNTING BRACKETS FOR M-SERIES MEGAFRAME®, C-SERIES SLIMFRAME® AND T-SERIES STEELFRAME CABINETS

The Vertical PDU Mounting Bracket Kit is used to attach vertical rack-mount power distribution units (PDUs) with tool-less mounting hardware to M-Series MegaFrame® Cabinet Systems, C-Series SlimFrame® Cabinet Systems and T-Series SteelFrame Cabinets.

- The kit includes one pair of mounting brackets that attach to the top and bottom rail supports on the side of the cabinet
- The brackets support two 2.4" W (61 mm) or narrower PDUs side-by-side
- The brackets include tool-less attachment points spaced 64.75" (1645 mm) apart and require a minimum of 5.4" (136 mm) of equipment mounting rail setback to provide clearance for the PDUs at the rear of the cabinet
- The brackets position PDUs in the rear corner of the cabinet so that outlets on the PDUs face the middle of the cabinet
- One bracket kit is included with each 38U or taller M-Series MegaFrame Cabinet System and each 37U or taller C-Series SlimFrame Cabinet System manufactured after August 1, 2011; a second kit can be added to the opposite side of the cabinet to support up to four PDUs in the rear of the cabinet, two per side
- This kit is not compatible with the 14U or 25U M-Series MegaFrame Cabinet System, the E-Series ISP Co-Location Cabinet or the Seismic Frame® Cabinet System
