

## Surge-Suppressed Duplex Receptacle for ThinLine II Wall-Mount Cabinet

The cabinet can be easily configured with two surge-suppressed outlets in the electrical junction box. By utilizing surge-suppressed outlets, the cabinet does not require the installation of a power strip -- saving both money and rack mounting units.

The junction box can be mounted on either side of the cabinet. A 1/2" or 3/4" knockout is provided, allowing easy electrical access to the junction box.
