

Installation Instructions

RMR BAYING MOUNTING PANEL

Safety Information

WARNING: Improper use of this product may lead to serious injury. Read and understand all instructions for proper installation and use of this product.

Tools Required

10mm Socket Driver or Wrench
T25 Torx Screw Driver

Included Hardware

- (9) M6 Serrated Flange Hex Head Screw
- (2) M6 Serrated Flange Nut
- (6) M6 Cage Nut
- (2) M5.5 Torx Pan Head Tapping Screw

Assembly Sequence

1. Attach bottom bracket to baying mounting panel using M6 screws and serrated flange nuts (torque 88 IN-LB [9.9 N-M]) (Figure 1).
2. Install one M6 cage nut at top, middle, and bottom of mounting panel height on both sides (Figure 1).
3. Attach top bracket to bayed cabinets using M5.5 self-tapping screws (torque 44 IN-LB [5 N-M]) at depth location for bayed mounting panel to be flush with adjacent full size mounting panels (Figure 2).
4. Rotate bayed mounting panel into position between adjacent full size panels with bottom bracket engaging plastic boots. (Figure 3)
5. Secure baying mounting panel to top bracket using M6 screw (torque 88 IN-LB [9.9 N-M]) (Figure 4).
6. If shipping installed, secure baying mounting panel to adjacent full size mounting panels using M6 screws (torque 88 IN-LB [9.9 N-M]) at bottom, middle, and top on both sides (Figure 5).
