

NEW CATALOG ITEM

ORGANIZING. STORING. SECURING.

FEATURES:

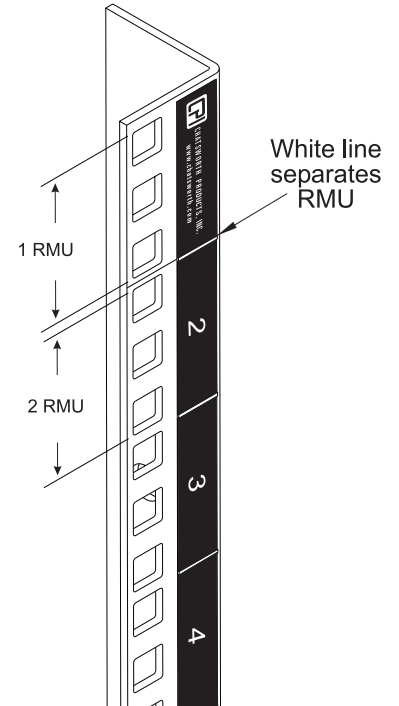

- New RMU Labels help avoid misalignment of equipment during installation.
- Pre-plan equipment placement using RMU Labels as a guide.
- RMU Labels provide a quick reference tool so equipment can be easily identified for diagnostic or inventory purposes.
- Retrofittable to existing cabinets and racks.
- Labels eliminate the need to manually calculate RMU location.

RACK MOUNT UNIT LABEL KIT

The new Rack Mount Unit Label Kit from CPI significantly reduces installation time. Designed to enhance CPI's rack and cabinet systems, RMU Labels are the perfect addition to every installer's tool kit - providing a quick and easy method to facilitate equipment alignment and preplan installations.

Easy-to-read numbers take the guesswork out of aligning components and eliminate the need for manual RMU calculation. RMU Labels allow equipment on hand to be installed while waiting for new components to arrive. This enables you to make your installation more efficient and provides you with the ability to preplan future installations. Using the labels in conjunction with rack and cabinet layouts allow equipment configurations to be duplicated.

Two RMU Label Kits are available. One accommodates 7' racks and cabinets with up to 45 RMU. The second kit is designed for 8' or 9' racks and cabinets and provides numbering up to 58 RMU. Each RMU Label Kit contains four individual label packs. Each pack will label one cabinet or two racks. Labels come in strips to facilitate retrofitting cabinets with installed equipment. Strips are constructed of 1/2" wide durable polyester film with adhesive backing and are black with RMU numbers printed in white. Side orientation of numbers allow labels to be installed with the RMU numbering starting from the top or bottom of the rail. Kits are sold as accessories and have a shipping weight of 1 lb.
