

# CPI Mini Catalog App

Install this free mobile app on your iPad.

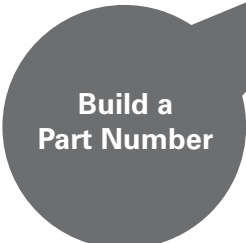

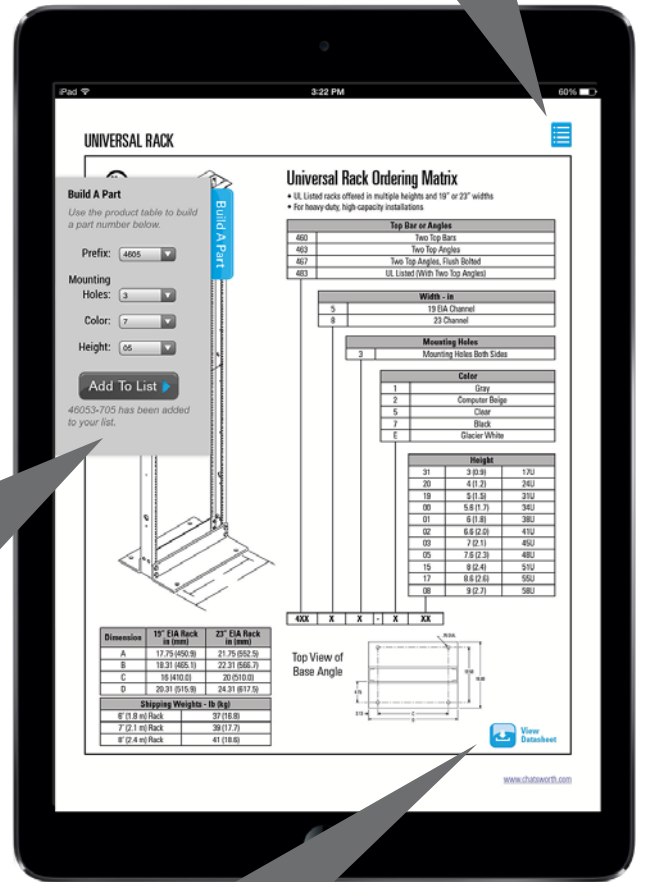

CPI's popular Mini Catalog is now a free mobile app developed by Chatsworth Products, Inc. (CPI) to help IT and telecommunications professionals search for products and part numbers on the go.

## The CPI Mini Catalog App features the ability to:

-  Create a bill of material (BOM) list
-  Search pages by keyword or part number
-  Link to product documents
-  Bookmark pages

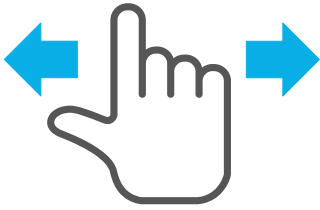

The BOM list and document links can be conveniently emailed to your contact list and for more assistance, can be sent to CPI's Technical Support or Sales Team.

Designed to be a standalone app, it does not require a network connection to function. To view product documents through links and email, simply connect to a wireless network.

Protecting your technology investment.

Navigate through the catalog.

Left and right to navigate between sections.

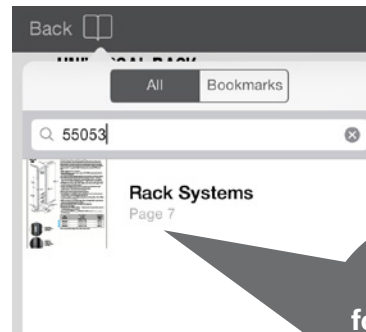

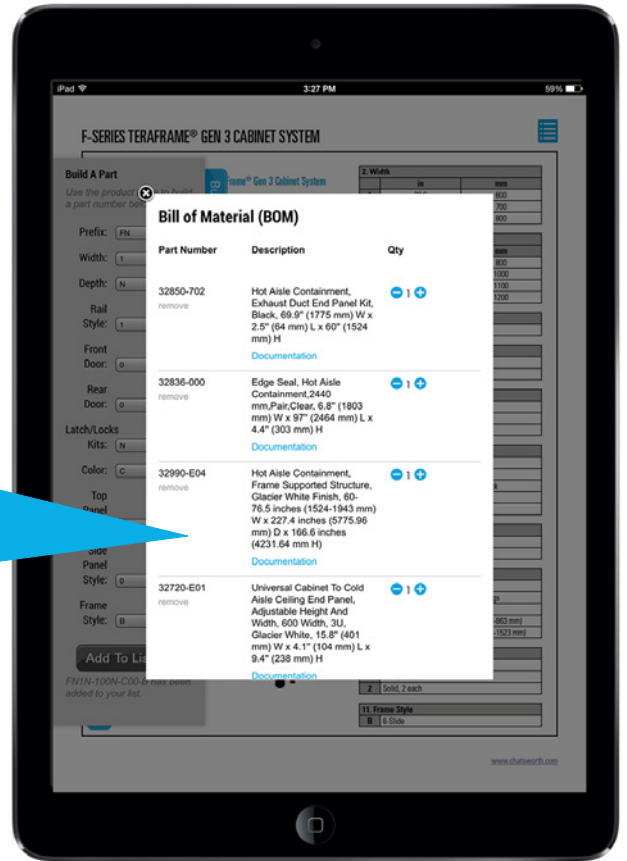

Up and down to navigate through the pages.

Use the plus button to add products to your BOM List.

Email your BOM List & Documentation Links

Search for Keywords and Bookmark Pages
