

Protect Security and Communications Equipment in Residential and Commercial Centers

When installing electrical, security and communications equipment that may support multiple dwelling units (MDU) or fiber for the home (FFTH), you should have confidence that sensitive and expensive components are being protected from harsh elements in outdoor environments.

The enclosures that house this equipment should be high quality, providing years of environmental protection. Timing is also critical. Enclosures should arrive on time, and include the required accessories.

Chatsworth Products (CPI), an experienced enclosure designer and manufacturer, is trusted by companies around the globe to help protect their technology investments.

You can rely on CPI for :

- Complete line of NEMA-rated enclosures for indoor and outdoor applications
- High-quality products and protection, featuring formed-in-place seals
- Factory customization, including provisions for electrical connections, all within competitive lead times
- Reliable service, responsive customer support and global distribution
- Designed and manufactured in the United States
- Industry-leading warranties

Sample Application

A major residential property management company needed to protect Internet, voice and television equipment in residential complexes across the United States. This required NEMA-rated indoor/outdoor enclosures with 19" EIA mounting rails and climate control. Long enclosure lead times and missed deadlines began affecting business, so they looked to CPI. CPI provided on-time delivery, as well as service, warranty and customization options not previously available with their current supplier.

	Previous Supplier	Chatsworth Products
Cooling / Heating Capacity	2000 BTU cooling 500 watt heater	2000 BTU cooling 900 watt heater
Cabinet Warranty	30 days	3 years
AC Warranty	1 year operable parts; 5 years non-operable	2 years all parts
Door Seal	Slip-on bulb seal	Seamless, robotically applied foam gasket
Mounting Rails	Fixed position	Adjustable depth

Protecting
your technology
investment.

CPI's RMR® Industrial Enclosures are available in thousands of standard configurations and can be customized to meet specific needs. Provisions for HMI, controls and electrical connections are made before the enclosures leave the factory—reducing labor and installation time and guaranteeing proper finishing.

You can reduce installation time further by relying on CPI for other key solution components, such as power distribution units, grounding and bonding products and cable management products.

Let CPI help you keep your residents and personnel happy, and increase your property value with exceptional quality, service and products. Contact your local [CPI Sales Manager](#).

On-Demand Configuration

Millions of configuration and personalization options are available through the CPI Product Designer to help you meet your unique NEMA protection needs. The CPI Product Designer gives you the ability to quickly select and accessorize RMR Industrial Enclosures under one part number for easy ordering and tracking.

The CPI Product Designer guides you through the steps and selections necessary to create an enclosure that meets your unique size requirements and thermal and cable management needs. You will get bills of material, drawings, 2D models and sales documents automatically.

Go to www.chatsworth.com/product-designer to design your RMR Industrial Enclosure.

Manufacturing Capabilities and Global Availability

Headquartered in the United States, CPI operates from multiple sites worldwide, including offices in Mexico, Canada, China, the United Arab Emirates and the United Kingdom. CPI's manufacturing facilities are located in the United States, Asia and Europe. Standard products are readily available through a global network of industry-leading distributors. With stock availability and CPI's consistently short factory lead times, you can be assured that CPI solutions will be accessible to meet your project scheduling needs.

The CPI Total Solution Includes
