Installation Instructions

Evolution® and Motive® Horizontal Cable Managers

Tools Required

#2 Phillips screwdriver

Parts List

Horizontal Chassis
Horizontal Cover
(Rack mounting screws are not included)

Application

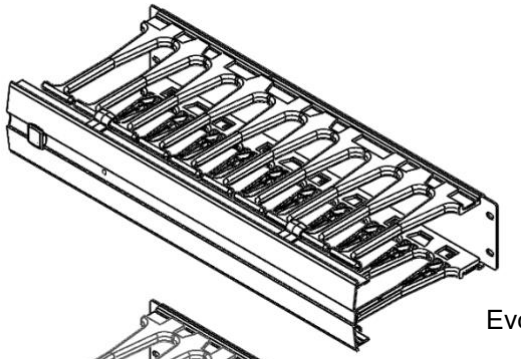

The Evolution and Motive Horizontal Cable Managers organize patch cords and cables above and below patch panels and network switches.

Installation Notes

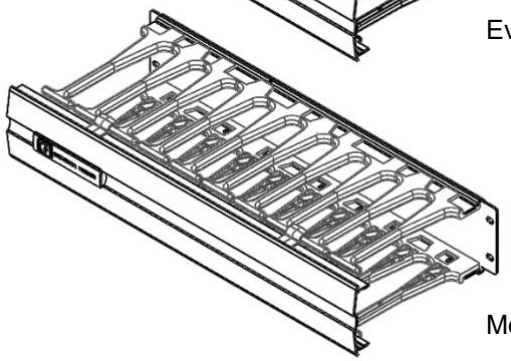

- Installation requires two to four equipment mounting screws depending on the height of the horizontal manager.
- The cover will open up or down and can be removed when cabling.

Assembly Sequence

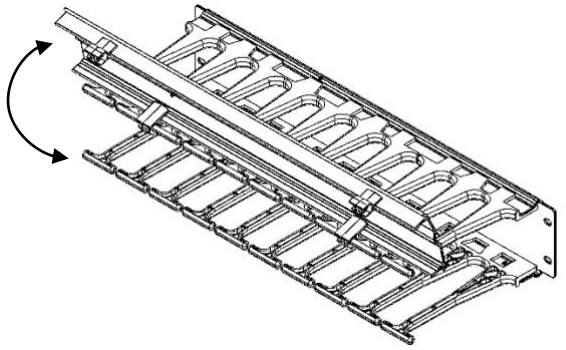

1. Remove the horizontal cover from the horizontal chassis. The cover snaps onto the ends of the plastic, T-shaped cable guides (fingers).
2. Align the horizontal chassis to the desired RMU elevation on the rack. The mounting holes at the back of the chassis will align with rack-mount holes on the rack.
3. Secure the horizontal chassis to the rack using equipment mounting screws and #2 Phillips screwdriver. Install one screw for every mounting hole in the horizontal chassis.
4. Dress cables into the manager using the fingers to organize cables.
5. Reattach the horizontal cover.
