Safety Information

WARNING: Improper use of this product may lead to serious injury or death. Read and understand all instructions for proper installation and use of this product.

Intended Use

Attaches two CPI Vertical Power Strips to the keyholes in the sides of Seismic Frame Two-Post Rack or the keyholes in the back of the Seismic Frame Two-Post Rack Vertical Cabling Section.

Tools Required

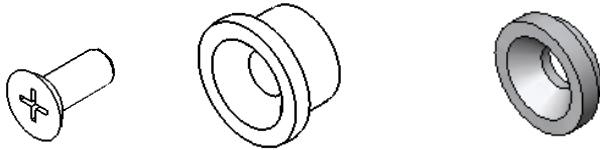

Phillips screwdriver

Included Hardware

4 each
#10 x 1/2" L screw

4 each tall
shoulder washers
(use on rack)

4 each short
shoulder washers
(use on cabling section)

Installation Notes

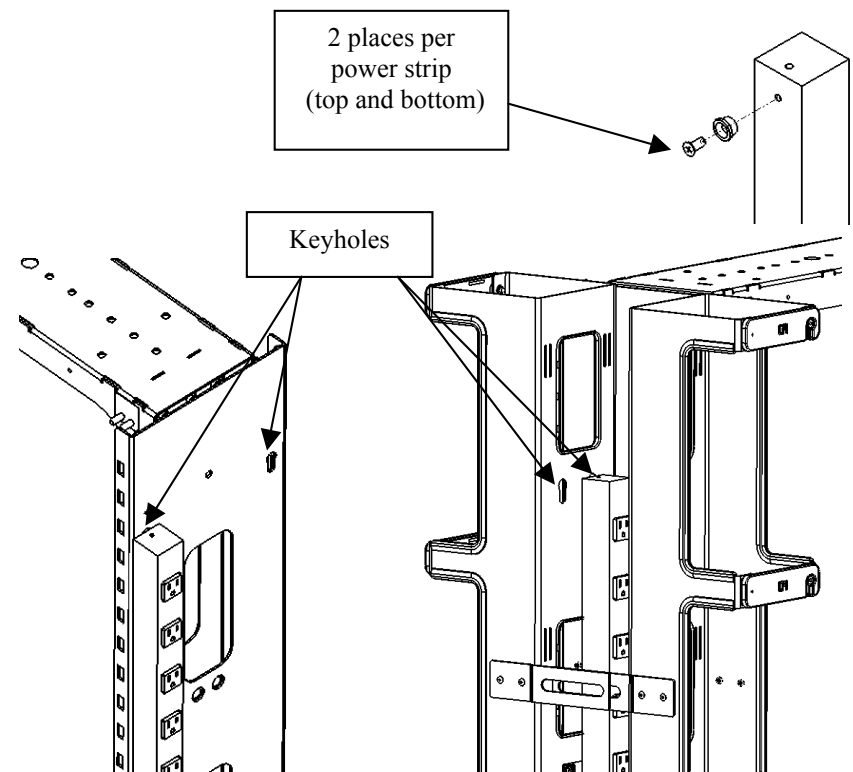

Install power strips before shelves and rack-mount equipment.

All CPI Vertical Power Strips can attach to the outside of the rack channel (as shown) unless a vertical cable manager is used in the same space.

CPI Vertical Power Strips that are 1.6"W (41 mm) or less can attach inside the rack channel unless a Cable Management Fingers Kit is used in the same corner.

Assembly Sequence

1. Attach two shoulder washers to each vertical power strip with included screws. Use tall washers to install on rack; short washers to install on vertical cabling section. Kit can be used to attach two power strips.
2. Pass shoulder washers through the large part of the keyhole slot in the side of the rack/back of the cabling section; then lower the power strip so that the shoulder washer is captive and supported in the slot.
