

Service Parts for RMR Wall-Mount Enclosures

Cooling Unit by Pfannenberg for RMR Wall-Mount Enclosure Systems

Replacement cooling unit for RMR Wall-Mount Enclosures. Closed-loop cooling is required when the ambient temperature is greater than the target internal temperature of the enclosure, or when higher ingress protection (NEMA Type 12 rating) is necessary.

- Side-mounting
- Able to perform efficiently in high temperature areas
- Uses environmentally friendly HFC-free R134a refrigerant
- Backward curve impeller fan optimizes airflow and extends service life
- Condenser coils are coated with corrosion protection to extend service life
- Wide condenser fin spacing reduces particulate clogging while balancing performance
- Hermetically sealed compressors prevent refrigerant loss
- Condensate drain port to remove moisture
- Closed-Loop Cooling isolates the external ambient air from the internally conditioned air, eliminating the risk of contaminants entering the enclosure
- Standard size is:
 - Side mounted, 900-1,300 Btu/hr (263-381 W), 115V
