

MOMENTUM VERTICAL CABLE MANAGER WITH RINGS

KEY FEATURES

- General purpose cable manager for use with open two-post or four-post racks
- Open design provides easy access to cables
- Sturdy C-shaped, vertical metal channel supports cable weight and creates a distinct front and rear cable pathway
- Edge-protected pass-through ports in the channel allow front-to-rear cabling
- Includes seven smooth plastic rings to secure and protect cables
- Rings have a flexible front opening for easy addition or removal of individual patch cords
- Rings attach to the front and rear of the channel
- Order the accessory ring kit to add deeper rings to the rear of the channel for larger premise cable bundles

APPLICATIONS

- Use with open two-post or four-post racks that store interconnect and network equipment in telecommunications and equipment rooms to provide clean, simple vertical cable management alongside the racks

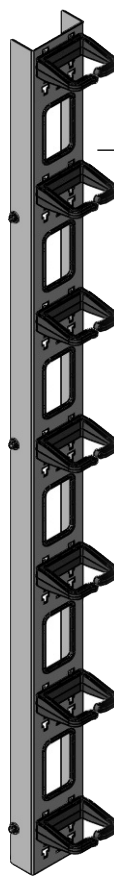

USE WITH

- Standard Rack
- Adjustable QuadraRack®
- Adjustable ServerRack
- Adjustable Rail QuadraRack®
- Adjustable Rail ServerRack
- Velocity® Horizontal Cable Manager

RELATED ACCESSORIES

- GlobalTrac Wire Mesh Cable Tray System
- Velocity® Cable Management

Availability: Asia Pacific

Attach to side of Open Rack

Simple, effective vertical cable pathway for managing cables

The Momentum Vertical Cable Manager with Rings is a simple, cost-effective vertical cable manager for use with open two-post and four-post racks. Open racks typically use less floor space than traditional IDF cabinets, but provide similar or higher equipment load. Momentum attaches to the side of an open rack, creating a simple, effective vertical cable pathway for managing cables. Together, open racks with Momentum Vertical Cable Managers are ideal for use in small, secure equipment rooms that will house one or two equipment racks.

The Momentum Vertical Cable Manager with Rings is designed for use on the 2.1 m high (45U) open rack. It includes a sturdy, steel vertical C-shaped channel and seven durable plastic cable rings. The channel has fourteen evenly spaced snap-in locations for cable rings and six edge-protected front-to-rear openings for cables. Rings can attach to the front or rear of the channel and have a small flexible opening at the front for easy addition or removal of cables. Standard configuration is shown above with included rings attached on the front side.

The Momentum Vertical Cable Manager D-Ring Kit is an optional accessory that includes seven additional rings which are typically used on the rear of the manager to create a complete front and rear vertical pathway for cables. The Momentum Vertical Cable Manager D-Ring Kit includes deeper rings to store larger premise cable bundles.

CPI offers a complete solution of fully compatible server and network equipment storage racks, cable management and cable tray. Ordering information is listed on the reverse. Contact CPI Technical Support for assistance.

SPECIFICATIONS

- Provides vertical cable management for low voltage, telecommunications, network and fiber optic cables alongside open two post and four post equipment racks
- For indoor use only, in environmentally controlled areas; may not be used outdoors or in harsh environments
- Available sizes:
 - See DIMENSIONS
- Cable Fill Capacity:
 - See DIMENSIONS
- Material:
 - Channel is steel; rings are plastic
- Construction:
 - Rings snap onto channel and secure with hardware
 - Ships unassembled
- Finish:
 - Powder coat paint
 - Black

DIMENSIONS

| Part Number | Cable Ring Dimensions | | | | |
|-------------|-----------------------|---------------|---------------|---------------|-----------------|
| | Outside | | Inside | | Cable Fill Area |
| | Width in (mm) | Depth in (mm) | Width in (mm) | Depth in (mm) | |
| 84897-703 | 5.5 (140) | 4.7 (119) | 4.2 (107) | 3.5 (89) | 14.7 (9480) |
| 84898-001 | 5.5 (140) | 9.8 (249) | 4.2 (107) | 8.6 (218) | 36.1 (23 290) |

| Part Number | Cable Fill Area Of Rings in ² (mm ²) | Estimated Cable Fill Capacities | | | |
|-------------|---|---------------------------------|---------------------|---------------------------------|---------------------|
| | | For 0.20 in. (5.08 mm) OD Cable | | For 0.30 in. (7.62 mm) OD Cable | |
| | | Recommended (50% Full) | Maximum (100% Full) | Recommended (50% Full) | Maximum (100% Full) |
| 84897-703 | 14.7 (9480) | 116 | 233 | 51 | 103 |
| 84898-001 | 36.1 (23 290) | 287 | 574 | 127 | 255 |

Note: Estimated cable fill for loose, unbundled cables. Fill is calculated by dividing the Cable Fill Area by the area of the cable. 50% of the result is Maximum fill. 25% of the result is Recommended fill.
