Clik-Nut® Hardware Kit

Clik-Nut®
Redefining the Cage Nut

- Fast installation saves you time
- Easy, tool-less attachment and removal
- Use anywhere you would use standard cage nuts
- Available in M6, #12-24 and #10-32 thread sets
- Fits .375” (9.5 mm) square hole
- Grip range 16 ga to 12 ga, .060” to .105” (1.52 mm to 2.67 mm panel thickness)
- Includes mounting screws

Performs like a traditional cage nut without the hassle.

Hold Clik-Nut by the tab. Squeezing the tab allows the nut to be inserted and/or removed from mounting holes.

Orient tab away from EIA space.

Align, squeeze, insert and release. To mount a panel, place fasteners at the same location/height/U space on opposite rails. Typically, a minimum of four Clik-Nuts and screws should be used per panel. Attach panel with included screw.
